

Digitally transform your retail store network with the CORTIX™ platform

Get predictive actionable insights on the availability, compliance, health and efficiency of your equipment.

Your retail business is facing multiple challenges - rising costs, increasing customer expectations, stiff competition from e-tailers, limited visibility of store operations and store remodeling costs. Why choose typical energy management systems that do not consider the context of your store operations?

Benefit from our domain expertise and CORTIX™ Building IoT platform's strong, context-based approach across formats such as department stores, grocery stores and supermarkets, warehouses, specialty retail, convenience stores and discount stores.

Partner with us and transform your retail chain with multiple benefits:

Improved Energy Efficiency

Enhanced Occupant Comfort

Proactive Maintenance Management

Improved Equipment Efficiency

Increased Visibility of Operations

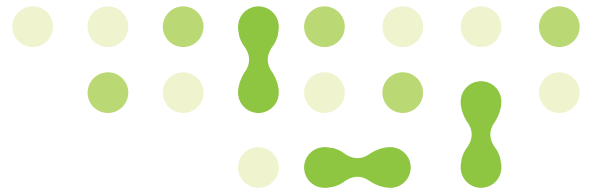

Operational Excellence

Enhanced Food Safety

Energy Demand Management

Success story

A leading big box retailer in the U.S.A

1,900 stores managed

11% average monthly energy savings

25% increase in time between equipment failure

27% decrease in technician visits

We transformed the HVAC maintenance from being reactive to being proactive and condition-based. Over **58%** dispatches for Roof Top Units (RTU) issues were proactively carried out without any complaints from stores. The improved maintenance of assets also enhanced in-store experience for store associates and customers.

Recognition

Frost & Sullivan positioned EcoEnergy Insights in the Visionary section of the 2019 Frost Radar® chart.
